Pipe and column coverings made of Schlüter-KERDI-BOARD

Ideal tile substrate

The innovative, prefabricated L-shaped and U-shaped panels of the Schlüter-KERDI-BOARD system make it especially easy to conceal pipes and columns.

The panels feature V-shaped grooves and are shipped in a space-saving flat design, which makes them easy to store.

The flat panels are also quick to cut to the necessary dimensions. Thin-set mortar, Schlüter-KERDI-FIX adhesive, or double-sided adhesive tape is applied to the V-grooves.

The panels are folded prior to installation.
